3rd

SCORE (Out of 10)

3.69

HOW TO READ THE DATA: Since each indicator has a different unit, to enable comparison, we rebased values to score the state's performance in a band of 1 to 10. The line graphs show how the state compares, on each indicator, against the other 6 small-sized states. The longer the lines, the better the state is doing. 'Worst value' and 'best value' point to the highest and lowest results in that indicator.
