Juvenile Justice and Children in Conflict with the Law: A Study of Capacity at the Frontlines

Published in November 2025 by India Justice Report

The Juvenile Justice Study assesses how well states have equipped themselves to fulfill their statutory obligations under the Juvenile Justice (Care and Protection of Children) Act, 2015 specifically in relation to Children in Conflict with Law (CCL). Drawing primarily on parliamentary responses, and a year-long RTI-based inquiry across states, the study analyses the capacity of key institutions—Juvenile Justice Boards, Child Care Institutions, Special Juvenile Police Units, and Legal Services—across four vital parameters: infrastructure, human resources, budgets, and diversity.

By bringing siloed data to one place, this IJR study provides policy makers, active citizens and stakeholders with a valuable resource with which to address serious challenges and improve the overall functioning of the system.

❖ How to read a factsheet:

The state factsheets present information on how well key institutions— Juvenile Justice Boards¹, Observation Homes², Special Homes³, Places of Safety⁴, Special Juvenile Police Units⁵ and Legal Services⁶—met mandates under the JJ Act 2015 between 1st November 2022 to 31st October 2023.

Unless otherwise specified, all figures are based on RTI responses received.

❖ Areas common to all states:

- 1) **NP** means “Not Provided”
- 2) **Children in child care institutions are sourced** from the Lok Sabha Unstarred Question No. 4264 dated 31st March 2024.
- 3) **Total workload of a JJB** is the sum of cases pending from all previous years and includes those received between 1st November 2022 - 31st October 2023.
- 4) **Share of disposals (%)**: $(\text{Cases disposed} / \text{total workload}) \times 100$
- 5) **Inspections by JJBs**: A JJB must inspect each home at least once every month or 12 times in a year.⁷ IJR measured the number of visits to each home over 12 months.
- 6) **Workload of LCPOs**: Each district must have one designated LCPO.⁸ LCPO workload is calculated by the number of cases before a JJB divided by LCPO in that district.

⁴ Bihar did not respond to the query on caseload and therefore we could not assess it. A document titled "Consolidated Chart Showing the Pendency and Disposal of Cases in the JJBs of Bihar During the Year of 2022" points to a total workload of over 3.7 lakh cases cumulatively before the 37 JJBs in the state and a pendency of 3.62 lakh cases in the period between January - December 2022. However, the provenance of the document could not be verified. The document is available here: <https://patnahighcourt.gov.in/jjs/PDF/UPLOADED/250.PDF>

⁵ Only 17 districts responded to this query.

⁶ Kaimur, Munger and Vaishali districts did not provide information on legal service clinics attached to JJBs but recorded a roster of specialised lawyers to deal with juvenile related cases.

About the Juvenile Justice Study

The **Juvenile Justice Study** assesses how well states have equipped themselves to fulfill their statutory obligations under the Juvenile Justice (Care and Protection of Children) Act, 2015 specifically in relation to Children in Conflict with Law (CCL). Drawing primarily on parliamentary responses, and a year-long RTI-based inquiry across states, the study analyses the capacity of key institutions—Juvenile Justice Boards, Child Care Institutions, Special Juvenile Police Units, and Legal Services—across four vital parameters: infrastructure, human resources, budgets, and diversity.

By bringing siloed data to one place, this IJR study provides policy makers, active citizens and stakeholders with a valuable resource with which to address serious challenges and improve the overall functioning of the system.
